

FEEL CONFIDENT ARRIVING SAFELY TO
YOUR DESTINATION!

Bullfrog Boats are manufactured with our customers' safety in mind. Unlike the majority of inflatable boats on the market, our boats are constructed using virtually indestructible, polyethylene tubes with internal flotation foam – creating an extremely stable and safe craft with five times the impact resistance of typical fiberglass boats.

All bullfrogs are built using the highest quality materials and modern manufacturing techniques. Precise CAD Engineering and computer controlled laser and router cutting machines are used so quality is built in. Marine grade aluminum is used for the hull, transom and lift eyes.

BULLFROG BOATS

NO INFLATING, NO DEFLATING, NO WORRIES!

1. DURABILITY.

Bullfrog's polyethylene flotation collar has five times the impact resistance of fiberglass. Tube colors are UV protected and they resist fading and scratches. Bullfrogs are built to conform to USCG safety requirements.

2. FILLED WITH 30% FOAM.

30% Foam-filled construction keeps a Bullfrog afloat under the most extreme conditions. With a Bullfrog there is no inflating, no deflating, no worries.

3. STABILITY.

The solid (bolted together) wide stance of a Bullfrog makes getting on board and off a sure-footed experience. The semi-deep V-hull provides a dry, stable ride.

4. BOLTED! NOT GLUED!

Bullfrog's production techniques make our boats even more durable. Well made, sturdy Bullfrog parts when bolted together will work much better than when glued.

BULLFROG'S UNPRECEDENTED FORMULA

The innovative design of Bullfrog Boats combines the 30% foam-filled positive flotation construction, the stability of a wide-stance platform, and the durability of a polyethylene flotation collar with an aluminum hull. The result is a unique combination of Bullfrog Boats main abilities: Stability and Durability.

BULLFROG BOATS PROUDLY MADE IN AMERICA!

Today Bullfrog Boats has become one of the most popular boats in the Pacific Northwest and are gaining in popularity all over North America. It's tough to find a harbor that doesn't have a Bullfrog!
